Michelangelo
Michelangelo, was an Italian Renaissance painter, sculptor, architect, poet and engineer. He created the colossal statue portraying David for the city of Florence as a symbol of its independence and freedom. The block of marble that the David was carved from was dubbed 'The Giant' as it was one of the largest blocks of marble to be quarried, a towering 4.5 meters high.

The work depicts such classical characteristics as a full body nude and contrapposto pose (standing with most of its weight on one foot so that its shoulders and arms twist off-axis from the hips and legs) which was an important sculptural reintroduction of the human body used to express a psychological disposition.

Pope Julius II commissioned him to paint the ceiling of his personal Sistine chapel. The chapel was 40 meters in length, and it took him 4 years to paint.
