Artist Chair Sculpture

An art gallery has commissioned you to create an original chair sculpture reflecting a specific artist. The work must show clear evidence of the artistic style and art period/movement of the specific artist chosen.

You will first create 3 different conceptual sketches, which will be evaluated. You will also submit a statement outlining the chosen artist, art period/movement and artistic style in your chair sculpture and the painting & sculpture techniques you used in creating it.

STEP ONE: RESEARCH THE WORK OF OTHERS: Select one of the artists below and research their artwork and style. What movement are they associated with? Print off samples of their work.

Renaissance Artists
Botticelli
Michelangelo
Raphael
Leonardo DaVinci
Jan Van Eyck
Albrecht Durer

Baroque & Rococo Artists
Caravaggio
Bernini
Artemisia Gentileschi
Peter Paul Rubens
Rembrandt
Diego Velázquez
Vernier
Francisco Goya

Neoclassical Artists
Jacques Louis David
Jean Auguste Dominique
Ingres

Realism Artists
Edouard Manet
Gustave Courbet
Winslow Homer
Jean-Baptiste-Camille Corot
Honore Daumier
Rosa Bonheur

Canadian Artists
Tom Thompson
Lawren Harris
Alex Coville
Emil Carr
Norval
Morrisseau
Joyce Wieland
Joe Fafard

Japanese Artists
Katsusika Hokusai
Ando Hiroshige
Torii Kiyonobu I

Chinese Artists
Kuo His
Chao Meng-Fu

Indian Artists
(See Art History Booklet)

STEP TWO: DRAW: In your sketchbook 3 different conceptual sketches of possible chair designs that you are interested in creating.

- Consider the elements and principles of design. (Shape, Form, Texture, Balance): How does your chosen artist apply the elements & principles of design to create their own unique style?
- Consider the artist style & movement: How will your reflect their sculpture/painting technique(s)?
- Your finished work must show clear evidence of influence from contemporary or past works of art.

STEP THREE: CREATE: Follow your approved conceptual sketch and begin creating your work using wire and plaster strips. WRITE your Artistic Statement Template to document your artistic process. REVIEW: the painting techniques in this handout.

Don’t Plagiarize!
Copyright applies to text and visual materials that are taken from both the internet and print sources. Plagiarism is defined as “using the work (or part of it) of another person and claiming it as your own.”

STEP FOUR: REFLECT: Answer the following questions using the elements and principles of design and complete your Artistic Statement Template for formal evaluation.

1. What part of your finished project did you find most successful and why?
2. What part of your finished project did you find least successful and why?
3. If you had to do this project, what part would you change or improve on and why?
A) Artist Chosen: ______________  Art Period/Movement: ______________

How does the artist create his unique artistic style and how does his work reflect the specific art period/movement:

B) Painting & sculpture techniques used in my work and how they reflect chosen artist style and artistic period/movement:
Painting Techniques

There are so many ways of painting with acrylic that no book can possibly do justice to them all. However there are certain basic techniques:

Opaque Technique: The simplest way to work with acrylic is to squeeze the color directly from the container onto the palette, brush in just enough water to produce a creamy consistency, and then apply masses of solid color to the painting surface. And the second layer of color will hide the first. For obvious reasons, this is called the opaque technique. It's a rapid, direct way to paint.

Transparent Technique: If you add much more water to the color, you’ll produce a pool of tinted water called a wash. You can see right through it to the surface of the your palette, and you’ll also see through the transparent colour when you brush it onto the painting surface. The dried paint is like a sheet of coloured glass. A second coat will modify the first coat, the two will mix in the viewer’s eye but one coat won’t conceal another. That’s why this is called the transparent technique.

Scumbling: To create tonal gradations from dark to light, or shade one colour into another - it’s important to learn how to handle the brush. Scumbling is a kind of scrubbing motion that spreads a veil of colour across the surface. When scumbling, you want other colors to show thru each layer.

Dry Brush: is a painting technique in which a paint brush that is relatively dry but still holds a paint load is applied to a dry support such as paper or primed canvas. The resulting brush strokes have a characteristic scratchy look that lacks the smooth appearance that washes or blended paint commonly has.

Masking: can describe materials used to control the development of a work of art by protecting a desired area from change. Masking or painters tape can be used to cover a particular area from another paint layer. Usually used in painting to create a percise, sharp, hard or straight lines.

Combining Techniques: Naturally, there are many ways of combining these techniques. In painting a portrait head, it’s common to paint the lighted areas opaquely and then paint the shadows in transparent colour. Scumbling might produce the soft transitions from light to shadow, at places such as the cheeks or the brow. As you spend more time working with acrylic you will find your own combinations.

</table>
A1.1 use various strategies, individually and/or collaboratively, to generate, explore, and elaborate on ideas and to develop and revise detailed plans for the creation of art works that address a variety of creative challenges (e.g., use brainstorming, concept web, and/or groups discussions to formulate original ideas for thematic works and/or works of personal expression; use research and discussions with a partner to explore and elaborate on ideas; use diagrams, notes, and/or outlines to help them formulate detailed plans for the art works; revise their plans on the basis of reflection)

A1.2 apply the appropriate stages of the creative process to produce and revise two- and three-dimensional art works using a variety of traditional and contemporary media (e.g., explore, experiment with, and refine their use of a variety of media; choose a medium/media appropriate for their planned art work; reflect on the effectiveness of preliminary versions of their work; revise their art work on the basis of reflection and useful feedback)

A2. The Elements and Principles of Design: apply the elements and principles of design to create art works for the purpose of self-expression and to communicate ideas, information, and/or messages;

A2.1 explore how elements and principle of design can be used to convey emotion and enhance personal expression, and use a combination of these elements and principles to create two- and three-dimensional art works that express personal feelings and communicate specific emotions to an audience (e.g., explore how variations in line, value, form, proportion, and emphasis can be used to convey various emotions; adapt their findings to enhance expression in their art work)

A3. Production and Presentation: produce art works, using a variety of media/materials and traditional and emerging technologies, tools, and techniques, and demonstrate an understanding of a variety of ways of presenting their works and the works of others.

A3.2 explore a range of traditional and current materials, technologies, techniques, and tools used by visual artists (e.g., Claude Monet's use of optical colour mixing; Andy Warhol's use of silkscreens; George Segal's use of plaster bandage; Jean-Paul Riopelle's use of a palette knife for impasto application of paint; Daphne Odjig's use of interconnecting black lines), and adapt and apply them to create original art works

B1. The Critical Analysis Process: demonstrate an understanding of the critical analysis process by examining, interpreting, evaluating, and reflecting on various art works;

B1.1 analyse their initial response to art works (e.g., describe their initial reaction to an art work and determine which specific aspects of the work and their personal experience led to their reaction)

B1.2 deconstruct the visual content and the use of elements and principles of design in their own art work and the work of others (e.g., identify individual elements and principles and aspects of the visual content in an art work; interpret their function, and analyse how the artist has manipulated them to create impact, emphasis, mood, movement, and meaning; compare The Abduction of the Daughters of Leucippus by Peter Paul Rubens to the cover of a contemporary comic book about an action hero, with reference to the artists' use of colour, line, shape, value, balance, and emphasis)

B1.3 explain, with reference to particular works, both historical and contemporary (e.g., J. M. W. Turner's Rain, Steam, and Speed: The Great Western Railway; Maya Lin's Vietnam Veterans Memorial), how knowledge of an art work's cultural and historical context, achieved through research, has clarified and enriched their understanding of the work's intent and meaning

B1.4 describe and reflect on the qualities of their own art works and the works of others, and evaluate the effectiveness of these works, using a variety of criteria (e.g., the works' ability to convey a message or emotion; their technical merit; their stylistic qualities; the use of technique and successful manipulation of media/materials; the connection between form and message)

B2. Art, Society, and Values: demonstrate an understanding of how art works reflect the societies in which they were created, and how they can affect both social and personal values;

B2.1 analyse the function and social impact of different kinds of art works in both past and present societies (e.g., the use of art works for ritualistic and religious purposes; for social and/or political commentary; as propaganda; as symbols of economic or social power; to commemorate people and/or historical events; to instruct)

B2.2 reflect on and explain how creating and analysing art works has affected their personal identity and values and/or changed their perceptions of society and social issues (e.g., with reference to their emotional awareness and their ability to express themselves; their awareness of stereotypes; their understanding of the meaning of objects and symbols associated with a variety of cultural groups; their awareness of and relationship to their physical environment; their position on social issues such as censorship, discrimination, inequality)

C1. Terminology: demonstrate an understanding of, and use correct terminology when referring to, elements, principles, and other components related to visual arts;

C1.1 demonstrate an understanding of the elements and principles of design, and use terminology related to these elements and principles correctly and appropriately when creating or analysing art works (e.g., when describing how they have used elements and principles in a sculpture to convey a sense of movement)

C1.2 explain terminology related to a variety of techniques, materials, and tools (e.g., additive and subtractive techniques, blazing, gesso, intaglio, layering, palette knife, scumbling, transfers, single-lens reflex [SLR] cameras, software used to edit digital photographs), and use this terminology correctly and appropriately when creating, analysing, and/or presenting art works

C1.3 using appropriate terminology, explain the creative process and describe in detail the critical analysis process, with particular reference to the role of deconstruction in the latter process

C2. Conventions and Techniques: demonstrate an understanding of conventions and techniques used in the creation of visual art works;

C2.1 demonstrate an understanding of a wide variety of techniques that artists use to achieve a range of specific effects (e.g., techniques used to create the illusion of depth and perspective and to create texture on different surfaces; the use of additive and subtractive sculpture, layering, positive and negative space, and relief to create effects)

C2.2 demonstrate an understanding of a variety of conventions used in visual arts (e.g., allegory, expressive exaggeration, juxtaposition, synectics; conventions associated with heroic, narrative, naturalistic, propaganda, realistic, and satirical art), and explain how they are used in different types of art works

C3. Responsible Practices: demonstrate an understanding of responsible practices in visual arts.

C3.2 demonstrate an understanding of health and safety issues and conscientious practices associated with the use of materials, property, techniques, tools, and technologies in visual arts (e.g., the appropriate use of aerosol products, utility knives, printing presses, electrical tools, computers; an awareness of appropriate precautions to take when exposed to physical and chemical hazards); and apply these practices when creating and/or presenting art works
